Navigate Acquires North Star World Trade Services

St. Paul, Minnesota
March 4, 2016

Following eight successful years in strategic partnership, Navigate Inc. has acquired North Star World Trade Services. Navigate, a technology focused transportation and logistics company, now combines forces with the 47-year-old international freight forwarder, North Star, to form a third party logistics (3PL) company with expansive expertise.

Navigate's now comprehensive breadth of services has positioned the Global Trade Management Company for aggressive expansion, including new wholly owned facilities in Shanghai and Hong Kong. Also expanding is Navigate's headquarters, which will relocate this spring to a 45,000 square foot property in Mendota Heights, MN.

"Bringing these companies together has allowed us to expand operations in China," said Joe Pelletier, president. "We have built a company that is substantial and gaining momentum. We have world class technology, carrier capacity, and the right people, enabling us to manage customers' domestic and international supply chains, faster and smarter than ever."

In addition, new branding has been unveiled beginning with a new website (www.navigate.com) featuring an expanded portfolio of global transportation and logistics services. "Our new website is key in our transformation, as it cohesively brings together all the aspects of these companies," said Pelletier, "and helps us showcase how Navigate is here to make the complex simple for our customers."
